Directions: Starting with row 1, moving left to right, circle all words above that describe you. Next move to row 2 thru row 10 until all words are circled that describe you. Total the number of words you circled in each column. Write the total at the bottom of each column in the space provided. Each column must have a different total. If any columns have the same total, you must break the tie by choosing another word in one of the columns or omitting a word that you have already circled that least describe you.
